Professional Summary

AI Engineer with 2+ years building ML systems, LLM pipelines, and scalable data products in Python. Deployed propensity models across 120K+ leads, reduced ETL processing time by 81%, and improved conversion rates by 28%. Experienced in Flask, AWS, Docker, and REST APIs focused on business-driven AI systems.

Technical Skills

Languages: Python, SQL, JavaScript

ML / DL: Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, BERT, Transformers, LLMs, RAG

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau

Cloud & MLOps: AWS S3, Azure, Docker, MLflow, CI/CD, Git

Frameworks: Flask, React.js, Next.js, Node.js, REST APIs, Microservices

Databases: PostgreSQL

Professional Experience

AI Engineer Jan 2025 – Present

Devout Growth Media Pvt. Ltd., Bangalore, India

- Engineered ETL pipelines on AWS S3 with CI/CD integration, reducing processing latency from 4 hours to 45 minutes.
- Deployed XGBoost propensity models ranking 120K+ leads, increasing campaign ROI by 22% and generating \$200K+ incremental revenue.
- Containerized ML inference services with Docker and MLflow, supporting 15K+ daily predictions with 99.9% uptime.
- Built automated Power BI and Tableau dashboards, reducing reporting time from 3 days to 4 hours.

AI Engineer Intern Jul 2024 – Jan 2025

Devout Growth Media Pvt. Ltd., Bangalore, India

- Built K-Means + RFM customer segmentation models on 50K+ records, improving conversion rates by 28%.
- Developed Random Forest demand classifiers achieving 87% accuracy and saving clients \$35K per quarter.
- Implemented automated data validation pipelines improving downstream model reliability.

Key Projects

Talent Scout – AI Hiring Assistant Python, LLMs, RAG

- Built a recruitment platform using LLM-based semantic search and RAG architecture, reducing manual screening effort by 70%.

Predictive EV Battery Degradation Model PyTorch, TensorFlow, LSTM

- Trained LSTM models on 100K+ telemetry samples achieving 92% prediction accuracy.

Fake News Detection Engine BERT, TF-IDF, Flask

- Developed an NLP pipeline on a 40K-article dataset achieving 96% classification accuracy.

Education

MSC in Data Science (Pursuing) 2026 – 2028

Vellore Institute of Technology

BCA in AI & Data Science 2022 – 2024

KR Mangalam University

Bachelor in Data Science 2021 – 2022

SP Jain School of Global Management

Certifications

- R Programming for Data Science
- Deep Learning & Neural Networks
- ML & Pattern Recognition
- Data Visualization & Storytelling
- All Certificates
